

Sandbox Deployment Pathway

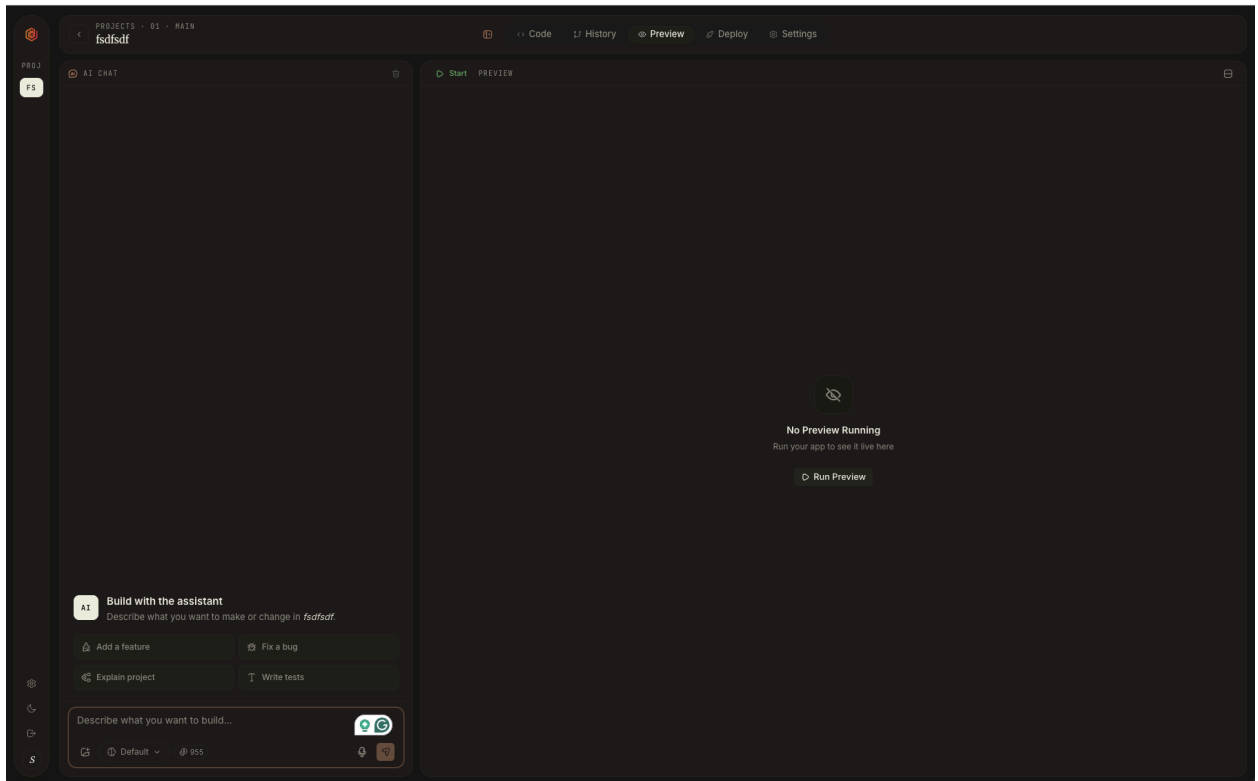

1. Click on start a new Project

2. Select a way to import your project

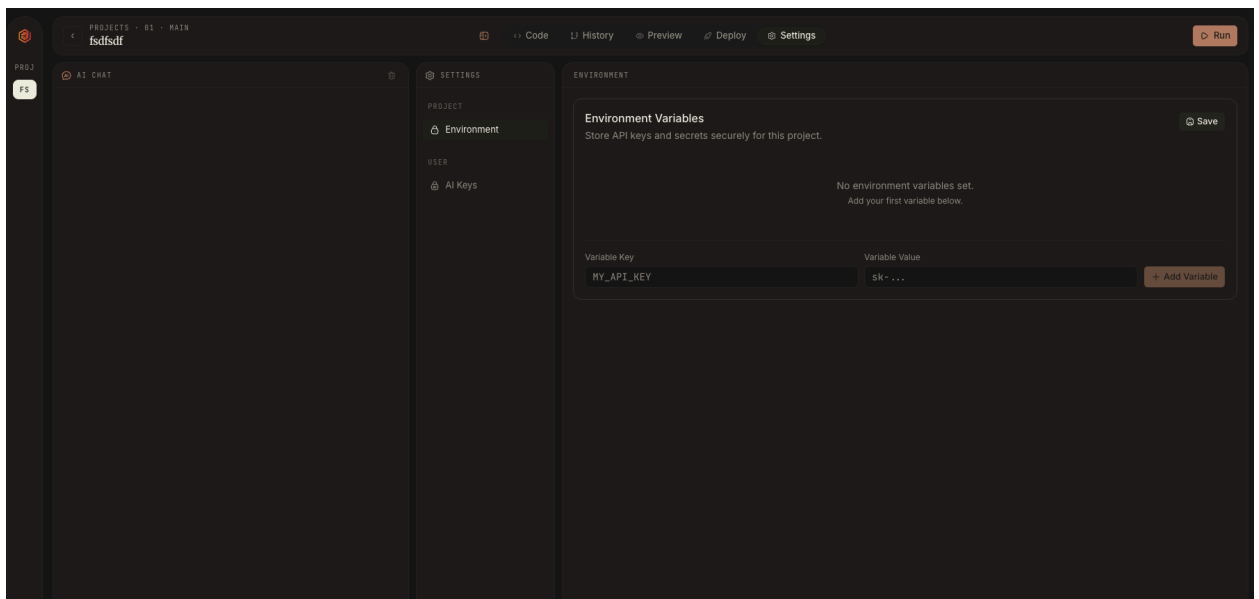

3. When you create/import the project you will land here.

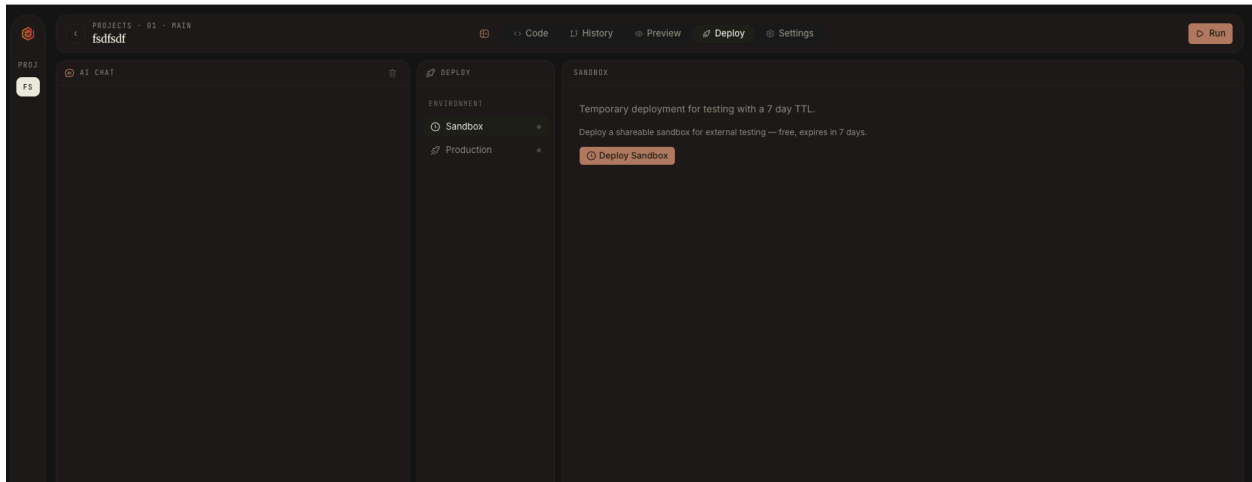

Try running preview to make sure your project can be run before the deployment.

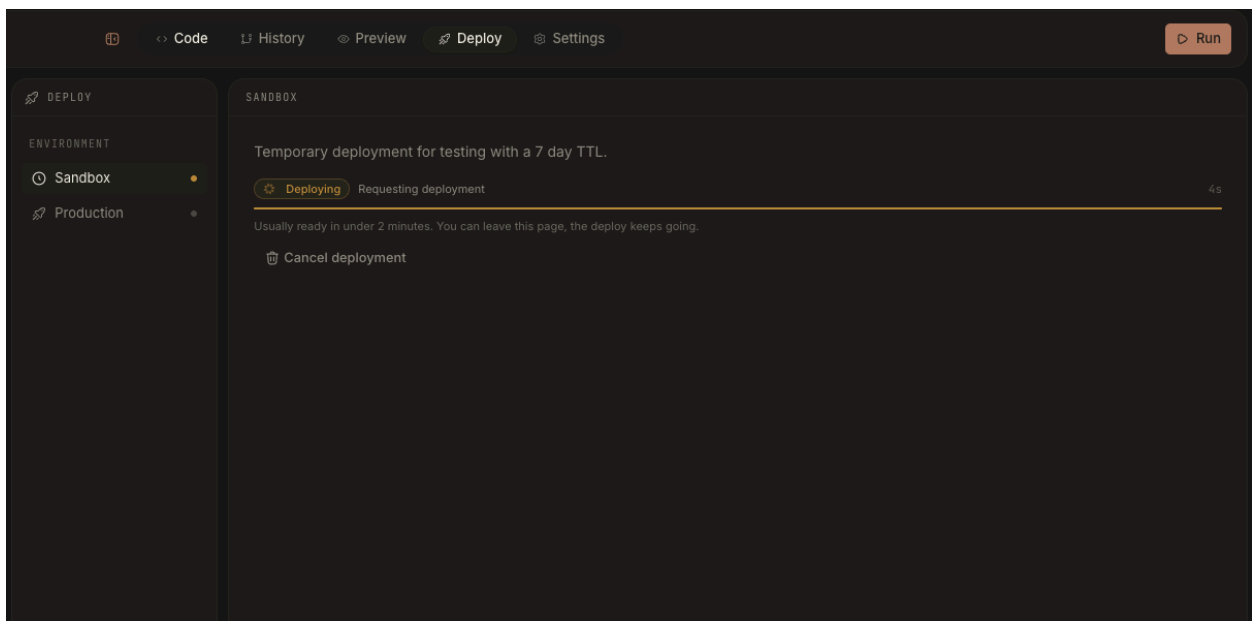

If there are any env variables add them in the project settings.

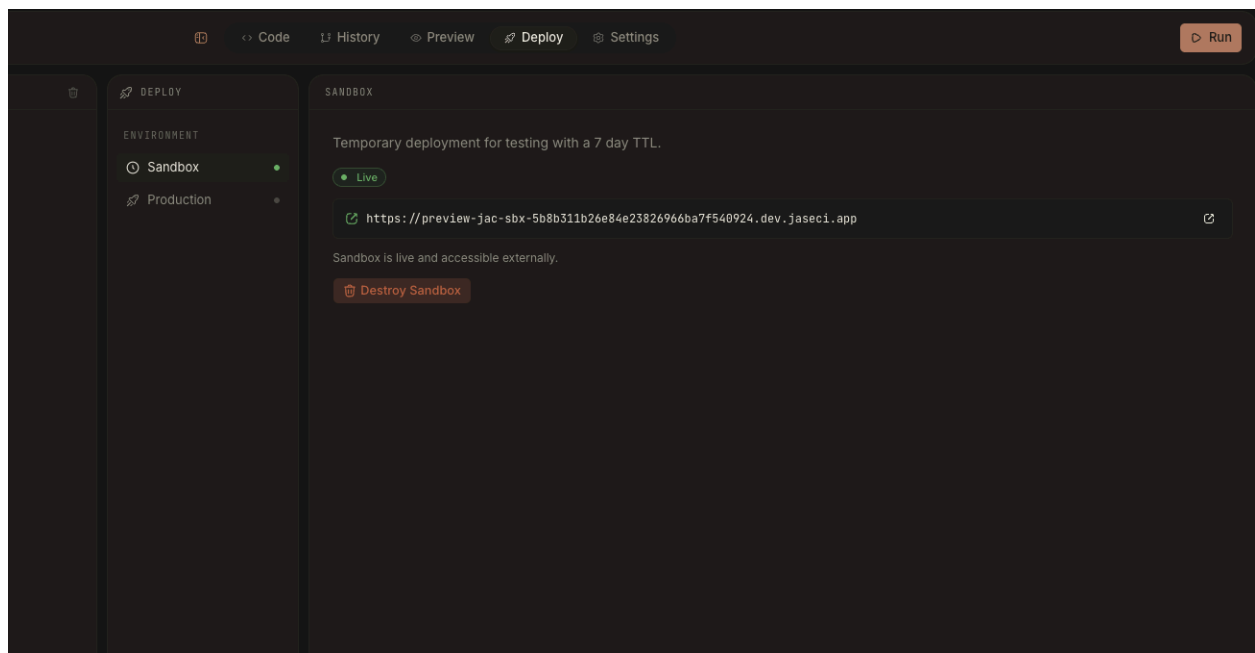

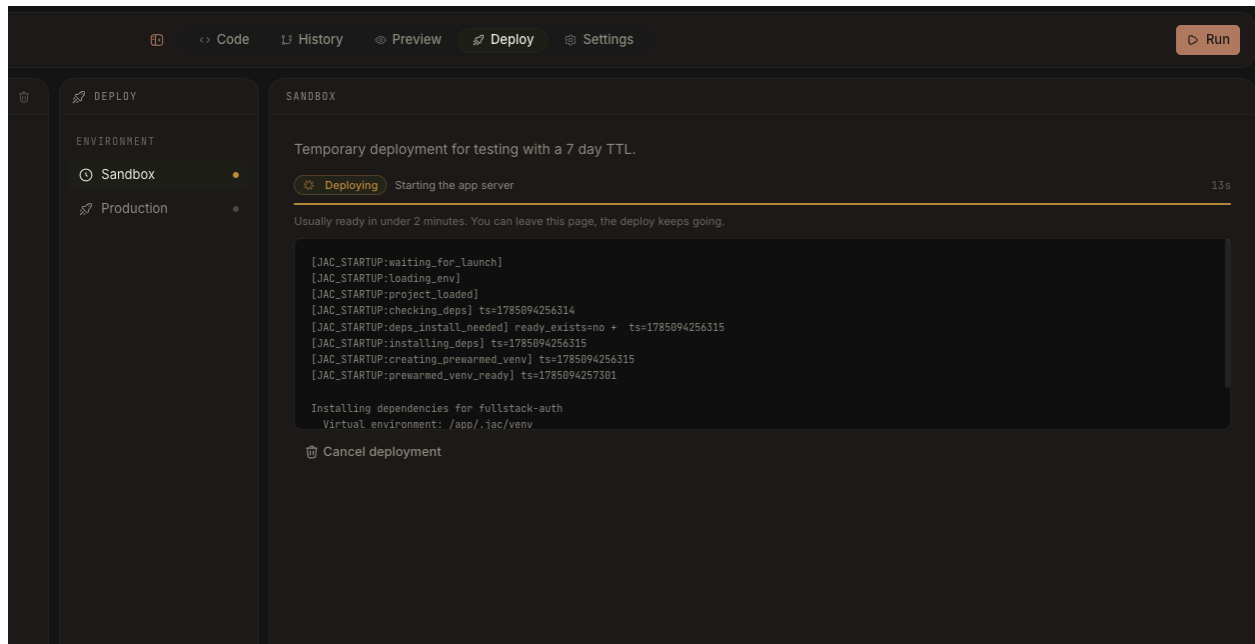

4. Once verified that your project run in a preview, Click on Deploy tab and go to the sandbox option

5. When you are ready click Deploy Sandbox

Once the deployment succeeds you will see the link !.
Average deployment time is under 2mins
